The Archaeology of Post-Medieval Religion (Society for Post Medieval Archaeology Monograph Series)

The post-medieval period was one of profound religious and cultural change, of sometimes violent religious conflict and of a dramatic growth in religious pluralism. The essays collected here, in what is the first book to focus on the material evidence, demonstrate the significant contribution that archaeology can make to a deeper understanding of religion. They take a broad interdisciplinary approach to the spatial and material context of religious life, using buildings and landscapes, religious objects and excavated cemeteries, alongside cartographic and documentary sources, to reveal the complexity of religious practices and identities in varied regions of post-medieval Britain, Europe and the wider world. Topics covered include the transformation of religious buildings and landscapes in the centuries after the European Reformation, the role of religious minorities and immigrant groups in early modern cities, the architectural and landscape context of eighteenth and nineteenth-century nonconformity, and the development of post-medieval burial practices and funerary customs. Offering a unique perspective on the material remains of the post-medieval period, this volume will be of significant value to archaeologists and historians interested in the religious and cultural transformation of the early modern world.
