Small and Micro Combined Heat and Power (CHP) Systems: Advanced Design, Performance, Materials and Applications (Woodhead Publishing Series in Energy)
Small and micro combined heat and power (CHP) systems are a form of cogeneration technology suitable for domestic and community buildings, commercial establishments and industrial facilities, as well as local heat networks. One of the benefits of using cogeneration plant is a vastly improved energy efficiency: in some cases achieving up to 80-90% systems efficiency, whereas small-scale electricity production is typically at well below 40% efficiency, using the same amount of fuel. This higher efficiency affords users greater energy security and increased long-term sustainability of energy resources, while lower overall emissions levels also contribute to an improved environmental performance.

Small and micro combined heat and power (CHP) systems provides a systematic and comprehensive review of the technological and practical developments of small and micro CHP systems.

Part one opens with reviews of small and micro CHP systems and their techno-economic and performance assessment, as well as their integration into distributed energy systems and their increasing utilisation of biomass fuels. Part two focuses on the development of different types of CHP technology, including internal combustion and reciprocating engines, gas turbines and microturbines, Stirling engines, organic Rankine cycle process and fuel cell systems. Heat-activated cooling (i.e. trigeneration) technologies and energy storage systems, of importance to the regional/seasonal viability of this technology round out this section. Finally, part three covers the range of applications of small and micro CHP systems, from residential buildings and district heating, to commercial buildings and industrial applications, as well as reviewing the market deployment of this important technology.

With its distinguished editor and international team of expert contributors, Small and micro combined heat and power (CHP) systems is an essential reference work for anyone involved or interested in the design, development, installation and optimisation of small and micro CHP systems.

- Reviews small- and micro-CHP systems and their techno-economic and performance assessment
- Explores integration into distributed energy systems and their increasing utilisation of biomass fuels
- Focuses on the development of different types of CHP technology, including internal combustion and reciprocating engines

From reader reviews:

Karen Olden:

Have you spare time for a day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity to get spend your time. Any person spent their very own spare time to take a move, shopping, or went to often the Mall. How about open or maybe read a book called Small and Micro Combined Heat and Power (CHP) Systems: Advanced Design, Performance, Materials and Applications (Woodhead Publishing Series in Energy)? Maybe it is to be best activity for you. You realize beside you can spend your time with the favorite's book, you can more intelligent than before. Do you agree with the opinion or you have various other opinion?

John Charlie:

A lot of people always spent their own free time to vacation or go to the outside with them friends and family or their friend. Do you know? Many a lot of people spent these people free time just watching TV, or even playing video games all day long. If you need to try to find a new activity honestly, that is look different you can read a book. It is really fun for yourself. If you enjoy the book you read you can spent the entire day to reading a e-book. The book Small and Micro Combined Heat and Power (CHP) Systems: Advanced Design, Performance, Materials and Applications (Woodhead Publishing Series in Energy) it doesn't matter what good to read. There are a lot of folks that recommended this book. These were enjoying reading this book. Should you did not have enough space to create this book you can buy the actual e-book. You can m0ore simply to read this book from a smart phone. The price is not too expensive but this book offers high quality.

John Keaney:

This Small and Micro Combined Heat and Power (CHP) Systems: Advanced Design, Performance, Materials and Applications (Woodhead Publishing Series in Energy) is great reserve for you because the content that is certainly full of information for you who all always deal with world and get to make decision every minute. This kind of book reveal it info accurately using great organize word or we can claim no rambling sentences inside. So if you are read it hurriedly you can have whole information in it. Doesn't mean it only provides straight forward sentences but challenging core information with attractive delivering sentences. Having Small and Micro Combined Heat and Power (CHP) Systems: Advanced Design, Performance, Materials and Applications (Woodhead Publishing Series in Energy) in your hand like keeping the world in your arm, information in it is not ridiculous a single. We can say that no guide that offer you world throughout ten or fifteen tiny right but this e-book already do that. So , this can be good reading book. Hey there Mr. and Mrs. occupied do you still doubt this?

Mildred Shaw:

Some people said that they feel weary when they reading a book. They are directly felt that when they get a half portions of the book. You can choose typically the book Small and Micro Combined Heat and Power

(CHP) Systems: Advanced Design, Performance, Materials and Applications (Woodhead Publishing Series in Energy) to make your reading is interesting. Your own skill of reading talent is developing when you including reading. Try to choose easy book to make you enjoy to learn it and mingle the sensation about book and studying especially. It is to be first opinion for you to like to open a book and learn it. Beside that the e-book Small and Micro Combined Heat and Power (CHP) Systems: Advanced Design, Performance, Materials and Applications (Woodhead Publishing Series in Energy) can to be your brand-new friend when you're experience alone and confuse using what must you're doing of these time.
