Frontiers in Complex Dynamics: In Celebration of John Milnor's 80th Birthday (Princeton Mathematical Series) Araceli Bonifant, Misha Lyubich, Scott Sutherland

John Milnor, best known for his work in differential topology, K-theory, and dynamical systems, is one of only three mathematicians to have won the Fields medal, the Abel prize, and the Wolf prize, and is the only one to have received all three of the Leroy P. Steele prizes. In honor of his eightieth birthday, this book gathers together surveys and papers inspired by Milnor's work, from distinguished experts examining not only holomorphic dynamics in one and several variables, but also differential geometry, entropy theory, and combinatorial group theory. The book contains the last paper written by William Thurston, as well as a short paper by John Milnor himself. Introductory sections put the papers in mathematical and historical perspective, color figures are included, and an index facilitates browsing. This collection will be useful to students and researchers for decades to come.

The contributors are Marco Abate, Marco Arizzi, Alexander Blokh, Thierry Bousch, Xavier Buff, Serge Cantat, Tao Chen, Robert Devaney, Alexandre Dezotti, Tien-Cuong Dinh, Romain Dujardin, Hugo García-Compeán, William Goldman, Rotislav Grigorchuk, John Hubbard, Yunping Jiang, Linda Keen, Jan Kiwi, Genadi Levin, Daniel Meyer, John Milnor, Carlos Moreira, Vincente Muñoz, Viet-Anh Nguyên, Lex Oversteegen, Ricardo Pérez-Marco, Ross Ptacek, Jasmin Raissy, Pascale Roesch, Roberto Santos-Silva, Dierk Schleicher, Nessim Sibony, Daniel Smania, Tan Lei, William Thurston, Vladlen Timorin, Sebastian van Strien, and Alberto Verjovsky.

From reader reviews:

Lorenzo Logan:

With other case, little folks like to read book Frontiers in Complex Dynamics: In Celebration of John Milnor's 80th Birthday (Princeton Mathematical Series). You can choose the best book if you love reading a book. So long as we know about how is important the book Frontiers in Complex Dynamics: In Celebration of John Milnor's 80th Birthday (Princeton Mathematical Series). You can add expertise and of course you can around the world by the book. Absolutely right, because from book you can understand everything! From your country till foreign or abroad you can be known. About simple thing until wonderful thing you are able to know that. In this era, we can easily open a book or even searching by internet device. It is called e-book. You may use it when you feel weary to go to the library. Let's learn.

Justin Perry:

People live in this new time of lifestyle always attempt to and must have the spare time or they will get lot of stress from both everyday life and work. So , whenever we ask do people have time, we will say absolutely of course. People is human not only a robot. Then we question again, what kind of activity have you got when the spare time coming to anyone of course your answer can unlimited right. Then ever try this one, reading books. It can be your alternative within spending your spare time, the particular book you have read is actually Frontiers in Complex Dynamics: In Celebration of John Milnor's 80th Birthday (Princeton Mathematical Series).

Troy Cochran:

This Frontiers in Complex Dynamics: In Celebration of John Milnor's 80th Birthday (Princeton Mathematical Series) is new way for you who has intense curiosity to look for some information mainly because it relief your hunger of information. Getting deeper you on it getting knowledge more you know or perhaps you who still having small amount of digest in reading this Frontiers in Complex Dynamics: In Celebration of John Milnor's 80th Birthday (Princeton Mathematical Series) can be the light food to suit your needs because the information inside this book is easy to get through anyone. These books produce itself in the form which is reachable by anyone, sure I mean in the e-book type. People who think that in publication form make them feel drowsy even dizzy this guide is the answer. So you cannot find any in reading a e-book especially this one. You can find actually looking for. It should be here for you. So , don't miss it! Just read this e-book sort for your better life as well as knowledge.

Jeff Cunningham:

That e-book can make you to feel relax. This book Frontiers in Complex Dynamics: In Celebration of John Milnor's 80th Birthday (Princeton Mathematical Series) was multi-colored and of course has pictures around. As we know that book Frontiers in Complex Dynamics: In Celebration of John Milnor's 80th Birthday (Princeton Mathematical Series) has many kinds or variety. Start from kids until young adults. For example

Naruto or Investigation company Conan you can read and believe you are the character on there. So , not at all of book are make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading which.
