Privatization, Corporate Governance and the Emergence of Markets (Studies in Economic Transition)
The volume focuses on privatisation in transition countries, addressing issues ranging from corporate governance to the relationship between privatisation and the emergence of markets, from a multi-disciplinary perspective. The contributors investigate both the theoretical groundwork of privatisation and enterprise restructuring as well as recent empirical evidence. The contributions show that changes in ownership titles are but one part of the story, being closely interwoven as they are with the transformation of corporate governance, enterprise restructuring, network transformation and the emergence of markets.
