Debunking 9/11 Debunking: An Answer to Popular Mechanics and Other Defenders of the Official Conspiracy Theory David Ray Griffin
By virtue of his previous four books on the subject, David Ray Griffin is widely recognized as one of the leading spokespersons of the 9/11 truth movement, which rejects the official conspiracy theory about 9/11. Although this movement was long ignored by the US government and the mainstream media, recent polls have shown that (as Time magazine has acknowledged) the rejection of the official theory has become "a mainstream political phenomenon." It is not surprising, therefore, that the government and the corporately controlled media have shifted tactics. No longer ignoring the 9/11 truth movement, they have released a flurry of stories and reports aimed at debunking it.

In the present book, David Ray Griffin shows that these attempts can themselves be easily debunked. Besides demonstrating the pitiful failure of *Debunking 9/11 Myths* (published by *Popular Mechanics* and endorsed by Senator John McCain), Griffin riddles recent reports and stories put out by the National Institute of Standards and Technology, the *New York Times*, *Vanity Fair*, and *Time* magazine as well as a new book by the chairmen of the 9/11 Commission. He also responds to criticisms of the 9/11 truth movement by left-leaning and Christian publications--which one might have expected to be supportive.

Throughout these critiques, Griffin shows that the charge that is regularly leveled against critics of the official theory-that they employ irrational and unscientific methods to defend conclusions based on faith-actually applies more fully to those who defend the official theory.

This book, by debunking the most prevalent attempts to refute the evidence cited by the 9/11 truth movement, shows that this movement's central claim-that 9/11 was an inside job-remains the only explanation that fits the facts.
