Return to Eden: A proposal for the prevention or removal of refractory, incurable diseases

Dimitris Grysmpolakis

Return to Eden: A proposal for the prevention or removal of refractory, incurable diseases Dimitris Grysmpolakis

This treatise is the product of research conducted for more than three (3) decades in order to interpret strange phenomena, resulting from some of my activities that are unusual for most people. All the phenomena have been interpreted using the laws of physics.

Several people identify as “miracles” other phenomena (yet closely related to the ones investigated hereafter). I knew from the very beginning that if I ever finish my research, the findings would be revolutionary, and would astonish people even with the most vivid imagination.

I propose a methodology based on Physical Education, in order to activate our underperforming, or almost incapacitated vital organs, and relieve the human race from the so-called "original sin", that is the diseases afflicting modern man due to his alienation from nature. I am fully aware that a valid research outcome should be based upon correlation indices between actions and results (Pirson, Baisirial etc.). I'm not a member of a research center. The methodology I propose has been tested on only three (3) subjects. The methodology is rather odd: Anyone who listens to me recommends keeping a low profile to avoid being "misunderstood".
