A Treatise on Conic Sections: Containing an Account of Some of the Most Important Modern Algebraic and Geometric Methods, 2d Rev. And Enl (Classic Reprint) George Salmon
Excerpt from A Treatise on Conic Sections: Containing an Account of Some of the Most Important Modern Algebraic and Geometric Methods, 2d Rev. And Enl

Art. 1. Geometrical theorems may be divided into two classes: theorems concerning the magnitude of lines, and concerning their position ; for example, that "the square of the hypothenuse is equal to the sum of the squares of the sides," is a theorem concerning magnitude; that "the three perpendiculars of a triangle meet in a point," is a theorem concerning position.

2. Theorems of the former class can easily be expressed algebraically. To take the example already given, if the lengths of the sides of a right-angled triangle be a, b, c, the proposition alluded to is written c2 = a2 + b2. The learner is probably already .familiar with this application of algebra to geometry, as the propositions of the Second Book of Euclid all relate merely to the magnitude oflines, and the demonstration of them is much simplified by the use of algebraical symbols.

3. But it is by no means so easy to see how to express algebraically theorems involving the position of lines. Accordingly, although algebra was, soon after its introduction into Europe, applied to the solution of the first class of questions, its use was not extended to this latter class until the year 1637, when Des Cartes, by the publication of his "Geometrie,' laid the foundation of the science on which wc arc about to enter.

About the Publisher

Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com

This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

From reader reviews:

Susan Tokarz:

Why don't make it to be your habit? Right now, try to ready your time to do the important act, like looking for your favorite e-book and reading a publication. Beside you can solve your trouble; you can add your knowledge by the book entitled A Treatise on Conic Sections: Containing an Account of Some of the Most Important Modern Algebraic and Geometric Methods, 2d Rev. And Enl (Classic Reprint). Try to the actual book A Treatise on Conic Sections: Containing an Account of Some of the Most Important Modern Algebraic and Geometric Methods, 2d Rev. And Enl (Classic Reprint) as your close friend. It means that it can to be your friend when you sense alone and beside associated with course make you smarter than ever. Yeah, it is very fortuned for you. The book makes you much more confidence because you can know almost everything by the book. So , we need to make new experience and also knowledge with this book.

Charline Bynum:

Now a day those who Living in the era where everything reachable by talk with the internet and the resources included can be true or not involve people to be aware of each info they get. How a lot more to be smart in having any information nowadays? Of course the solution is reading a book. Looking at a book can help folks out of this uncertainty Information especially this A Treatise on Conic Sections: Containing an Account of Some of the Most Important Modern Algebraic and Geometric Methods, 2d Rev. And Enl (Classic Reprint) book since this book offers you rich details and knowledge. Of course the knowledge in this book hundred per cent guarantees there is no doubt in it you know.

Randy Acevedo:

Is it anyone who having spare time in that case spend it whole day through watching television programs or just resting on the bed? Do you need something new? This A Treatise on Conic Sections: Containing an Account of Some of the Most Important Modern Algebraic and Geometric Methods, 2d Rev. And Enl (Classic Reprint) can be the reply, oh how comes? A book you know. You are therefore out of date, spending your spare time by reading in this fresh era is common not a geek activity. So what these publications have than the others?

Nicole Williams:

A lot of book has printed but it is different. You can get it by internet on social media. You can choose the most effective book for you, science, comedian, novel, or whatever by searching from it. It is identified as of book A Treatise on Conic Sections: Containing an Account of Some of the Most Important Modern Algebraic and Geometric Methods, 2d Rev. And Enl (Classic Reprint). You can add your knowledge by it. Without leaving behind the printed book, it could possibly add your knowledge and make a person happier to read. It is most significant that, you must aware about book. It can bring you from one destination for a other

place.
