Michael S. Block DMD

Color Atlas of Dental Implant Surgery - Elsevier Digital Book (Retail Access Card), 4e Michael S. Block DMD

- **Clear step-by-step procedures** include indications, contraindications, and treatment results for each procedure.
- **Over 1,400 full-color photographs and drawings** depict important concepts and techniques, and show treatment from beginning to end.
- **Indications and contraindications for each procedure** provide details of why a procedure is performed.
- **A discussion of the result of prosthodontic treatment** is provided for each case, explaining how implant placement factors into successful therapy.
- **Chapters are organized by oral anatomy and surgical technique**, with each chapter presenting a different area of the mouth or a specific surgical technique.
- **The *Mandible* section** covers various approaches to augmentation of the atrophic mandible, including a case that utilizes distraction osteogenesis.
- **Detailed cases of posterior mandible surgery** demonstrate onlay bone harvesting and grafting the deficient ridge.
- **The *Maxilla* section** features sinus grafting, hard and soft tissue procedures, and the relatively new zygomaticus implant procedure.
- **References** are provided at the end of every chapter for additional reading and research.

- **A companion DVD** includes illustrations from case studies plus 14 videos of procedures:

1. Horizontal ridge augmentation using tunneling technique
2. Posterior mandibular vertical augmentation using interpositional osteotomy
3. Horizontal ridge augmentation using particulate graft with membrane
4. CT guided maxillary surgery
5. Laser assisted intraimplant site sinus elevation surgery
6. Sinus augmentation using BMP and laser assistance
7. Placement of implants into the augmented site 6 months after the BMP graft
8. Piezotome assisted premolar extraction with immediate implant placement
9. Placement of implant in compromised central incisor site
10. Extraction with immediate implant placement
11. CT guided surgery for central incisor with custom healing abutment
12. CT guided anterior maxillary surgery with immediate provisionalization
13. Palatal approach for implant placement
14. Anterior maxillary interpositional osteotomy for vertical ridge augmentation

- **Guidelines for CT imaging** help you to accurately assess vital structures and discover bone shape and height, resulting in a more precise treatment planning sequence, including coverage of planning for a fixed prosthesis, immediate provisionalization in a patient with teeth, assessing bone prior to implant placement, immediate provisionalization using a CT-generated guide stent, angling implants to avoid the inferior alveolar nerve, and more.
- **New, cutting-edge techniques/procedures with photo sequences** include: the use of fibrin glue to augment ridge width with an open approach, angled implants as an alternative to sinus grafting, laser-

assisted intraimplant site sinus elevation surgery, zygomatic implants to support a nasal/maxillary prosthesis, strategies for maintaining the facial gingival margin when extracting and replacing an anterior tooth in the maxilla, the use of model-based surgery for guided implant placement, and many more.

- ***Immediate Provisionalization of Implant Restorations*** **chapter** covers single-tooth implant restorations and multi-unit restorations.
- Adds coverage of **immediate placement of implants** at the time of tooth extraction.
- Discusses **critical factors for esthetic central incisor implant restorations**.
- Covers **immediate loading of the edentulous mandible** with provisional and final restorations, and discusses **augmentation of the thin ridge** using particulate materials, providing the patient with complete restoration of function within minutes of implant placement.
- Covers the use of **distraction osteogenesis** for severely atrophic anterior maxillary sites and **treatment of anterior maxillary atrophy** with onlay grafts for fixed prosthetics, to restore the patient with severe maxillary defects and create the soft tissue needed for bone graft and later implant placement.
- Discusses new technique for **bone morphogenetic protein for sinus augmentation**, so patients may have recombinant BMP placed with bone formation allowing implant placement, without the need for morbid autogenous bone harvesting or the use of allografts or xenografts.
- Covers **extraction site protocols** to reconstruct and preserve bone bulk in anticipation of implant placement, offering methods for grafting the extraction socket to allow for ideal implant placement at a later time.

From reader reviews:

Brent Thompson:

The knowledge that you get from Color Atlas of Dental Implant Surgery - Elsevier Digital Book (Retail Access Card), 4e could be the more deep you looking the information that hide inside the words the more you get considering reading it. It does not mean that this book is hard to know but Color Atlas of Dental Implant Surgery - Elsevier Digital Book (Retail Access Card), 4e giving you enjoyment feeling of reading. The article author conveys their point in a number of way that can be understood by means of anyone who read it because the author of this publication is well-known enough. That book also makes your own personal vocabulary increase well. That makes it easy to understand then can go to you, both in printed or e-book style are available. We propose you for having this specific Color Atlas of Dental Implant Surgery - Elsevier Digital Book (Retail Access Card), 4e instantly.

Christine Pena:

Information is provisions for individuals to get better life, information presently can get by anyone in everywhere. The information can be a expertise or any news even a concern. What people must be consider any time those information which is from the former life are challenging be find than now could be taking seriously which one is acceptable to believe or which one the resource are convinced. If you find the unstable resource then you have it as your main information it will have huge disadvantage for you. All of those possibilities will not happen in you if you take Color Atlas of Dental Implant Surgery - Elsevier Digital Book (Retail Access Card), 4e as your daily resource information.

Olivia Cook:

Spent a free a chance to be fun activity to complete! A lot of people spent their free time with their family, or their very own friends. Usually they performing activity like watching television, likely to beach, or picnic inside park. They actually doing same every week. Do you feel it? Would you like to something different to fill your own personal free time/ holiday? Might be reading a book could be option to fill your free of charge time/ holiday. The first thing you ask may be what kinds of guide that you should read. If you want to try look for book, may be the reserve untitled Color Atlas of Dental Implant Surgery - Elsevier Digital Book (Retail Access Card), 4e can be excellent book to read. May be it might be best activity to you.

Susan Padgett:

A lot of e-book has printed but it differs from the others. You can get it by internet on social media. You can choose the most beneficial book for you, science, witty, novel, or whatever by searching from it. It is known as of book Color Atlas of Dental Implant Surgery - Elsevier Digital Book (Retail Access Card), 4e. You'll be able to your knowledge by it. Without making the printed book, it can add your knowledge and make you happier to read. It is most critical that, you must aware about e-book. It can bring you from one destination for a other place.
