Physical Therapy Documentation: From Examination to Outcome Mia Erickson, Becky McKnight MS PT, Ralph Utzman PT MPH
Complete and accurate documentation is one of the most essential skills for a physical therapist to develop and use effectively. Necessary for both new and experienced practitioners, ***Physical Therapy Documentation: From Examination to Outcome*** will teach and explain physical therapy documentation from A to Z.

Physical Therapy Documentation covers all of the fundamentals for prospective physical therapists preparing to work in the clinic or clinicians looking to refine and update their skills. Dr. Mia Erickson along with Rebecca McKnight and Dr. Ralph Utzman discuss documentation issues while providing a framework for the actual documentation format. In addition, ***Physical Therapy Documentation*** draws comparisons between the familiar, traditional documentation formats and contemporary models to provide a foundation for clinicians and students to use when documenting in any practice setting.

Practice exercises and case studies are provided throughout the text demonstrating note-writing across the continuum of care. This text will allow the student or clinician to produce quality documentation consistent with current standards of practice. *The Guide to Physical Therapist Practice* is referenced throughout the text as the model for patient/client management.

What's Inside:
• Disablement models
• Reasons for documentation
• Documentation formats
• Documentation and patient-client management
• Discussion of reimbursement issues
• Discussion of legal issues
• Practical tips for note writing

Throughout ***Physical Therapy Documentation***, The World Health Organization's International Classification of Functioning, Disability, and Health (ICF) language is used. The text is also correlated with the Nagi Model, which is well-known to most physical therapists, to help provide a bridge from the older model to the contemporary model.

Physical Therapy Documentation provides physical therapy students, educators, and clinicians with a valuable reference tool for documentation within contemporary physical therapy practice.
