Sets, Logic and Maths for Computing (Undergraduate Topics in Computer Science)

David Makinson

Sets, Logic and Maths for Computing (Undergraduate Topics in Computer Science) David Makinson This easy-to-follow textbook introduces the mathematical language, knowledge and problem-solving skills that undergraduates need to study computing. The language is in part qualitative, with concepts such as set, relation, function and recursion/induction; but it is also partly quantitative, with principles of counting and finite probability. Entwined with both are the fundamental notions of logic and their use for representation and proof. Features: teaches finite math as a language for thinking, as much as knowledge and skills to be acquired; uses an intuitive approach with a focus on examples for all general concepts; brings out the interplay between the qualitative and the quantitative in all areas covered, particularly in the treatment of recursion and induction; balances carefully the abstract and concrete, principles and proofs, specific facts and general perspectives; includes highlight boxes that raise common queries and clear confusions; provides numerous exercises, with selected solutions.

From reader reviews:

Wanda Legros:

Book is to be different for every single grade. Book for children until finally adult are different content. We all know that that book is very important for people. The book Sets, Logic and Maths for Computing (Undergraduate Topics in Computer Science) was making you to know about other knowledge and of course you can take more information. It doesn't matter what advantages for you. The publication Sets, Logic and Maths for Computing (Undergraduate Topics in Computer Science) is not only giving you much more new information but also for being your friend when you really feel bored. You can spend your own personal spend time to read your e-book. Try to make relationship using the book Sets, Logic and Maths for Computing (Undergraduate Topics in Computer Science). You never experience lose out for everything in case you read some books.

Byron Jorgensen:

Do you have something that that suits you such as book? The publication lovers usually prefer to choose book like comic, quick story and the biggest some may be novel. Now, why not striving Sets, Logic and Maths for Computing (Undergraduate Topics in Computer Science) that give your fun preference will be satisfied by reading this book. Reading behavior all over the world can be said as the way for people to know world a great deal better then how they react toward the world. It can't be stated constantly that reading habit only for the geeky man but for all of you who wants to always be success person. So , for all of you who want to start reading through as your good habit, you could pick Sets, Logic and Maths for Computing (Undergraduate Topics in Computer Science) become your own personal starter.

Ronda Tollison:

Can you one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Try and pick one book that you find out the inside because don't determine book by its include may doesn't work at this point is difficult job because you are frightened that the inside maybe not since fantastic as in the outside appear likes. Maybe you answer might be Sets, Logic and Maths for Computing (Undergraduate Topics in Computer Science) why because the fantastic cover that make you consider regarding the content will not disappoint you actually. The inside or content will be fantastic as the outside or maybe cover. Your reading sixth sense will directly assist you to pick up this book.

Anthony Wilson:

Don't be worry in case you are afraid that this book will probably filled the space in your house, you may have it in e-book way, more simple and reachable. This Sets, Logic and Maths for Computing (Undergraduate Topics in Computer Science) can give you a lot of friends because by you checking out this one book you have thing that they don't and make you more like an interesting person. This particular book can be one of a step for you to get success. This e-book offer you information that probably your friend

doesn't know, by knowing more than various other make you to be great individuals. So , why hesitate? We should have Sets, Logic and Maths for Computing (Undergraduate Topics in Computer Science).
