This comprehensive yet easy to understand training guide is for the Boeing 737 enthusiast and committed 737NGX simulator captain who enjoys challenges and wants to take their circuit-pattern flying ability to the highest level. The guide examines all parts of the circuit, providing full coverage for no-wind situations as well as crosswind technique, missed approaches, rejected takeoffs and engine-out ops. In addition to the intructor-style touch and go flight lessons, the guide provides pre-flight ground briefings and systems coverage of the autothrottle, control wheel steering, cockpit warnings, flap schedules and use of spoilers. Clear diagrams also explain balanced field length, drift angle, derated takeoffs, assumed temperature thrust reduction, as well as circuit geometry, descent profile and runway markings. This book is packed with all the information you need to be truly in command whilst flying the 737NGX in the circuit, containing all required checklists as well as over 80 reference screenshots and diagrams.
