Sexual Behavior in the Human Female Alfred C Kinsey, Institute for Sex Research, Wardell B Pomeroy, Paul H Gebhard
Sexual Behavior in the Human Female was originally published in 1953, five years after the male volume.The material presented in this book was derived from personal interviews with nearly 6,000 women; from studies in sexual anatomy, physiology, psychology, and endocrinology.

The book presents data on the incidence and frequency with which women participate in various types of sexual activity. The authors show how such factors as age, decade of birth, and religious adherence are reflected in patterns of sexual behavior. Some measure of the social significance of the various types of sexual behavior is provided. The authors make comparisons of female and male sexual activities, and investigate the factors which account for the similarities and differences between female and male patterns of behavior.
