Statistical Analysis of Epidemiologic Data (Monographs in Epidemiology and Biostatistics)

Steve Selvin

Statistical Analysis of Epidemiologic Data (Monographs in Epidemiology and Biostatistics) Steve Selvin
Analytic procedures suitable for the study of human disease are scattered throughout the statistical and epidemiologic literature. Explanations of their properties are frequently presented in mathematical and theoretical language. This well-established text gives readers a clear understanding of the statistical methods that are widely used in epidemiologic research without depending on advanced mathematical or statistical theory. By applying these methods to actual data, Selvin reveals the strengths and weaknesses of each analytic approach. He combines techniques from the fields of statistics, biostatistics, demography and epidemiology to present a comprehensive overview that does not require computational details of the statistical techniques described.
For the Third Edition, Selvin took out some old material (e.g. the section on rarely used cross-over designs) and added new material (e.g. sections on frequently used contingency table analysis). Throughout the text he enriched existing discussions with new elements, including the analysis of multi-level categorical data and simple, intuitive arguments that exponential survival times cause the hazard function to be constant. He added a dozen new applied examples to illustrate such topics as the pitfalls of proportional mortality data, the analysis of matched pair categorical data, and the age-adjustment of mortality rates based on statistical models. The most important new feature is a chapter on Poisson regression analysis. This essential statistical tool permits the multivariable analysis of rates, probabilities and counts.

From reader reviews:

Frances Oberlin:

Information is provisions for folks to get better life, information these days can get by anyone at everywhere. The information can be a know-how or any news even a huge concern. What people must be consider whenever those information which is inside the former life are challenging to be find than now could be taking seriously which one is acceptable to believe or which one the particular resource are convinced. If you obtain the unstable resource then you obtain it as your main information there will be huge disadvantage for you. All of those possibilities will not happen inside you if you take Statistical Analysis of Epidemiologic Data (Monographs in Epidemiology and Biostatistics) as your daily resource information.

Kim Salgado:

The guide with title Statistical Analysis of Epidemiologic Data (Monographs in Epidemiology and Biostatistics) includes a lot of information that you can learn it. You can get a lot of gain after read this book. This particular book exist new information the information that exist in this publication represented the condition of the world right now. That is important to yo7u to be aware of how the improvement of the world. This particular book will bring you within new era of the the positive effect. You can read the e-book with your smart phone, so you can read the item anywhere you want.

Anthony Davidson:

A lot of people always spent their own free time to vacation or maybe go to the outside with them friends and family or their friend. Are you aware? Many a lot of people spent many people free time just watching TV, or playing video games all day long. If you wish to try to find a new activity here is look different you can read the book. It is really fun for you personally. If you enjoy the book that you simply read you can spent the whole day to reading a publication. The book Statistical Analysis of Epidemiologic Data (Monographs in Epidemiology and Biostatistics) it doesn't matter what good to read. There are a lot of those who recommended this book. These people were enjoying reading this book. When you did not have enough space to bring this book you can buy the e-book. You can m0ore effortlessly to read this book through your smart phone. The price is not very costly but this book has high quality.

Ricardo Hempel:

The book untitled Statistical Analysis of Epidemiologic Data (Monographs in Epidemiology and Biostatistics) contain a lot of information on that. The writer explains the girl idea with easy approach. The language is very easy to understand all the people, so do certainly not worry, you can easy to read this. The book was compiled by famous author. The author gives you in the new time of literary works. It is easy to read this book because you can keep reading your smart phone, or product, so you can read the book within anywhere and anytime. In a situation you wish to purchase the e-book, you can open their official web-site as well as order it. Have a nice learn.
